

RISKS TO SMALL BUSINESSES OWNERS

- ✓ “....recently surveyed small businesses with less **than 50 employees** and found that this demographic is increasingly under threat. Out of the 400 small businesses surveyed, 77% had been a victim of a cyber-attack in the last month, **with one in five losing money as a result**”
- ✓ “....Over a third of cyber security incidents were classed as serious, involving either the business' website being hacked, high levels of malicious spam or a **loss of customer data**”
- ✓ “....Any businesses that is **connected to the Internet** is at risk for cyberattack”
- ✓ “....cyber issues are often resolved without the help of specialist expertise. In almost half (45%) of cases, cyber issues are addressed by the business owner, a personal friend or another, non-technical member of staff. Without proper training or knowledge, **taking this approach risks lengthening the problem, or making it worse – both of which lead to downtime and lost revenue**”
- ✓ “....As a small business, you hold valuable information on customers, your finances and details on partners. Hackers will therefore try to find holes”
